Subject: MS Case

As a Taxpayer I am disgusted that the Bush administration is letting Microsoft off the hook. I have been a long time support of Bush and the Republican party but this is not acceptable.

It has been proved without a shadow of doubt that MS attempted to gain a monopoly and used any means, including illegal ones to do that. IBM tried the same thing in the 70's and spent many years paying for the mistake. MS needs to be punished or they will continue to extend their monopoly.

I am a supporter of free enterprise and have opposed restrictions imposed on business by the Democrates but when free enterprise becomes a monopoly that can control all aspects of our lives it is time to stop it - that's what the antitrust laws are for. MS broke them and needs to be penalized.
